

# «EZE-Lift Trailer»

Weberlane Hydraulic Float Trailers

## ***A New Low in Float Trailers***

Finally, a trailer built not only to stand up, but also to kneel down.

***Because getting there  
shouldn't be a question.***

EZE-Lift's hydraulically-controlled box crouches low to the ground, so you can load your equipment and get back on the road quickly and hassle-free.

# Weberlane EZE-Lift Trailers

## A New Low in Float Trailers.

Weberlane Manufacturing introduces the EZE-Lift hydraulic float trailer. The EZE-Lift solves the problem of loading and transporting equipment like scissor lifts and forklifts that don't handle ramps. The bed of the EZE-Lift is hydraulically lowered parallel to the ground, equipment can now easily be driven up and transported. Risk of injury or equipment damage from tipping or getting stuck on the ramp is virtually eliminated.

The EZE-Lift comes standard with 3500lb Tandem Axles, electric brakes on one axle, ST205/75R15 Tires, Pressure Treated Wood Deck, 20" high sides, 6 tie-down anchors, 12V powerpack, Lockable plastic tongue box, and a 2 5/16" ball coupler.
