Keep your investments protected from theft and weather

A New Low in Float Trailers

Weberlane Manufacturing introduces the EZE-Lift hydraulic float trailer. The EZE-Lift solves the problem of loading and transporting equipment like scissor lifts and forklifts that don't handle ramps. The bed of the EZE Lift is hydraulically lowered parallel to the ground, equipment can now easily be driven up and transported. Risk of injury or equipment damage from tipping or getting stuck on the ramp is virtually eliminated.

**EZE-Lift makes it simpler to go from
“on the job” to “on the road”.**
