

# *Hybrid Dump/Cargo Trailer*

*Perfect for Landscaping & Contracting*

# Landscaping & Estate Use

## Strong Enough to Get the Job Done!

Built with the exact same quality, durability and craftsmanship as our full size Dump Trailers. These Dump/Cargo trailers can handle the toughest loads from 1-7 tons. These 2-in-1 trailers allow for you to use one truck to haul all your equipment. No more taking two trips back and forth to pick up and drop off your gear!

From mulch, to bedding soil, to fire wood, to stones or gravel, these trailers are ready to tackle all your landscaping or estate projects with ease.

**3WA**  
3-Way Access

Our Hybrid trailers add a new dimension of versatility with the ability to load from the front, side, or rear end.

Easily access equipment, load up your machinery, or use the bed for dumping or hauling heavy loads. This ingenious design allows you to adapt to any situation and will transform your business. With stability you can count on, and greater load capacity, these trailers are a dream come true for any landscaper or estate worker.

# Contracting & General Use

## Capacity, Versatility & Time Savings

These combination trailers meet all of these criteria. From material collection to equipment transportation, our hybrid trailers are designed and built with versatility in mind. With large front and side opening cargo doors, to a 45 degree tilt box, these trailers are a natural choice for today's contractors. They are an efficient alternative to conventional trailers because they are an all-in-one hybrid unit. With an overall capacity of 1 - 7 tons, this hybrid trailer can take whatever you can throw at it!

## No Job too Big!

These trailers have enough space in the box to fit a mini excavator and a skid steer (or more). The box is made of heavy duty steel material that is designed specifically to take on the punishing task of dumping gravel, stones, and much more. These heavy duty dumpers can easily handle any size job!

If you need a trailer to transport and dump the toughest of loads, don't get left in the dirt, get a Weberlane Hybrid Trailer!
